Art Unit: 3692

DETAILED ACTION

This final Office action is responsive to Applicant's amendment filed December
 2007.

Claim 2 has been amended. Claims 1 and 3 stand as withdrawn.

Claim 2 is presented for examination.

Response to Amendment

The previously pending objections to the specification are withdrawn in response to Applicant's amendments to the specification.

Response to Arguments

 Applicant's arguments filed December 10, 2007 have been fully considered but they are not persuasive.

Applicant argues that "systems such as the Lupien system do not permit trading orders that include fractional shares or odd lots, which would be considered economically unviable...In short, Lupien et al. fails to disclose anything regarding the execution or trading of economically unviable trades." (Page 7 of Applicant's response) In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., fractional shares or odd lots, which would be considered economically unviable) are not recited in the rejected claim(s). Although the claims are interpreted in light of the

Art Unit: 3692

specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Applicant's broad challenge of Official Notice (on page 6 of Applicant's response) is deemed to be an improper challenge since Applicant does not explain why the Official Notice is allegedly inaccurate. Applicant appears to be arguing the motivation to combine Lupien with the Official Notice teachings instead; however, Applicant's assertions rely on the improper assumption that economically unviable trades refer to trading orders that include fractional shares or odd lots (which is not claimed). The Examiner interpreted economically unviable orders to include, for example, trading orders that would not be completed because of a poor credit rating or simply the inability to pay money owed in association with a trade. For example, Silverman (U.S. Patent No. 5,924,082) assesses the viability of a trading arrangement based on the trading parties' credit risk, which may include a likelihood of a trading party to go into bankruptcy before the trade transaction is complete (abstract: col. 2, lines 41-67).

In conclusion, Applicant's arguments are non-persuasive and the art rejection is maintained.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Page 4

Application/Control Number: 10/627,873
Art Unit: 3692

 Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lupien et al. (U.S. Patent No. 5,845,266).

Lupien discloses a system for creating a portfolio of assets and executing trades in the assets to modify the portfolio, comprising:

- [Claim 2] a) a first processor interfaced with an investor's PC to select a plurality of assets to be in the investor's portfolio based on the investor's indicated preferences, to manage the portfolio in accordance with market changes and changes in the investor's indicated preferences, and to electronically place at least one trading order in accordance with the investor's indicated preferences (Figs. 2, 6, 7; col. 6, lines 29-39; col. 7, lines 30-47; col. 16, lines 25-29; col. 17, line 31 through col. 18, line 32 The trader's buy and sell baskets should be kept balanced. A trader's preference to become more or less aggressive about buying/selling a given security may change based on the execution status of other securities in the trader's actual/desired basket; col. 19, lines 23-26):
- b) a communication interface coupled to the processor and coupled to a plurality of other investors by which the processor electronically places the at least one order (col. 6, lines 29-39; col. 19, lines 23-26); and
- c) a central processor coupled to the communication interface, receiving a plurality of trading orders from among the plurality of investor's PC's, including at least one economically unviable trading order, and electronically forwarding the aggregated trading orders for execution to a third party (Figs. 4, 6, 7; col. 6, lines 29-39; col. 11.

Art Unit: 3692

lines 1-16; col. 14, lines 5-62 – A price and/or size limit or match of a trade may make or break the potential trade; col. 19, lines 23-26).

As per claim 2, Lupien states, "The CMC 2 can be coupled to an automated clearing system and/or accounting system. Orders that are matched can then be automatically output to such system(s) to assist in 'backoffice' procedures." (Col. 19, lines 23-26) Lupien does not expressly disclose that all received trading orders [which include at least one economically unviable trading order] are aggregated into a single order for each asset among the received trading orders; however, Lupien does send the matched orders to an automated clearing system and/or accounting system. Official Notice is taken that it was old and well-known in the art of finance at the time of Applicant's invention to approve or disapprove a transaction through an accounting system. Those of ordinary skill in the art at the time of Applicant's invention would have predicted that, if the accounting system determines that a particular trading order is economically unviable, then the trading order would likely not be approved (thereby preventing loss of profit to the party that would be owed money as part of the proposed trading order). Therefore, the Examiner submits that it would have been obvious to one of ordinary skill in the art at the time of Applicant's invention to modify Lupien such that all received trading orders (which include at least one economically unviable trading order] are aggregated into a single order for each asset among the received trading orders in order to take advantage of Lupien's accounting system to determine that a particular trading order is economically unviable so that the trading order would likely

Art Unit: 3692

not be approved (thereby preventing loss of profit to the party that would be owed money as part of the proposed trading order).

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., In re Berg, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); In re Goodman, 11 F.3d 1046, 29 USPC2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPC 645 (Fed. Cir. 1985); In re Van Omum, 686 F.2d 937, 214 USPC 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPC 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPC 944 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claim 2 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-86 of U.S. Patent No. 6,601,044.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claim of the instant application is fully anticipated by the claims of the patent. Elimination of an element or its functions is deemed to be obvious in light of prior art teachings of at least the recited element or its functions (see *In re Karlson*, 136 USPQ 184, 186; 311 F2d 581 (CCPA 1963)).

Art Unit: 3692

8. Claim 2 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-37 of U.S. Patent No. 6,996,539. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claim of the instant application is fully anticipated by the claims of the patent. Elimination of an element or its functions is deemed to be obvious in light of prior art teachings of at least the recited element or its functions (see *In re Karlson*, 136 USPQ 184, 186; 311 F2d 581 (CCPA 1963)).

Conclusion

 THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
